

## **Independent Practitioner's Limited Assurance Report to Smiths Group Plc**

### **Report on selected energy and greenhouse gas emissions information within the Sustainability section of Smiths Group plc's Annual Report and Accounts for the year ended 31 July 2025**

#### **Conclusion**

We have performed a limited assurance engagement on whether selected information in Smiths Group plc's ("Smiths" or the "Company") Sustainability section and /or 'Sustainability Data Disclosures' section of Smiths' Annual Report and Accounts (the "Report") for the year ended 31 July 2025 has been properly prepared in accordance with Smiths' 'Inventory Management Plan (IMP)' as set out at [GHG emissions | Smiths Group](#) (the "Reporting Criteria"). The information within the Report that was subject to assurance is indicated with the symbol "△" (the "Selected Information") (and is also listed in Appendix 1).

Based on the procedures performed and evidence obtained, nothing has come to our attention that causes us to believe that the Selected Information has not been properly prepared, in all material respects, in accordance with the Reporting Criteria.

Our conclusion is to be read in the context of the remainder of this report, in particular the "Inherent limitations in preparing the Selected Information" and "Intended use of our report" sections below.

Our conclusion on the Selected Information does not extend to other information that accompanies or contains the Selected Information and our assurance report (hereafter referred to as "Other Information"). We have not performed any procedures as part of this engagement with respect to such Other Information. We audited the financial statements, and the parts of the Directors' Remuneration Report to be audited, included within the Other Information and our report thereon is included with the Other Information.

#### **Basis for conclusion**

We conducted our engagement in accordance with International Standard on Assurance Engagements (UK) 3000 *Assurance Engagements Other Than Audits or Reviews of Historical Financial Information* ("ISAE (UK) 3000") issued by the Financial Reporting Council ("FRC") and[, in respect of the greenhouse gas emissions information included within the Selected Information,] in accordance with International Standard on Assurance Engagements 3410 *Assurance Engagements on Greenhouse Gas Statements* ("ISAE 3410") issued by the International Auditing and Assurance Standards Board ("IAASB"). Our responsibilities under those standards are further described in the "Our responsibilities" section of our report.

We have complied with the Institute of Chartered Accountants in England and Wales ("ICAEW") Code of Ethics, which includes independence and other ethical requirements founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour, that are at least as demanding as the applicable provisions of the International Ethics Standards Board for Accountants ("IESBA") *International Code of Ethics for Professional Accountants (including International Independence Standards)*.

Our firm applies International Standard on Quality Management (UK) 1 *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements* ("ISQM (UK) 1"), issued by the FRC, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

### **Other matter – comparative information**

The Selected Information includes the percentage metric “Global scope 1 and 2 GHG emissions reduction FY24 to FY25” which uses a year ended 31 July 2024 metric restated as described on pages 41 and 55 to 57 of the Report. We have reperformed the mathematical accuracy of the calculation of the percentage reduction metric and provided limited assurance over the input metric for the year ended 31 July 2025. However, we have not been engaged to, and so we have not provided, any assurance over the restated metrics for the year ended 31 July 2024, including Global scope 1 and 2 GHG (market-based) emissions for the year ended 31 July 2024.

Our limited assurance conclusion is not modified with respect to this matter.

### **Inherent limitations in preparing the Selected Information**

The nature of non-financial information; the absence of a significant body of established practice on which to draw; and the methods and precision used to determine non-financial information, allow for different, but acceptable, evaluation and measurement techniques and can result in materially different measurements, affecting comparability between entities and over time.

As described on page 5 of the Reporting Criteria, the greenhouse gas (“GHG”) emissions quantification process is subject to: scientific uncertainty, which arises because of incomplete scientific knowledge about the measurement of GHGs; and estimation (or measurement) uncertainty resulting from the measurement and calculation processes used to quantify emissions within the bounds of existing scientific knowledge.

For Scope 3 GHG emissions, there are also significant limitations in the availability and quality of GHG emissions data from third parties, resulting in Smiths’ reliance on proxy data in determining estimated Scope 3 GHG emissions. Over time better information may become available from third parties and the principles and methodologies used to measure and report Scope 3 GHG emissions may change based on market practice and regulation.

The Reporting Criteria has been developed to assist Smiths in reporting selected sustainability information to measure its progress against its sustainability strategy. As a result, the Selected Information may not be suitable for another purpose.

### **Directors’ responsibilities**

The Directors of Smiths are responsible for:

- designing, implementing and maintaining internal controls relevant to the preparation and presentation of the Selected Information that is free from material misstatement, whether due to fraud or error;
- selecting and developing suitable Reporting Criteria for preparing the Selected Information;
- properly preparing the Selected Information in accordance with the Reporting Criteria; and
- the contents and statements contained within the Report and the Reporting Criteria.

### **Our responsibilities**

We are responsible for:

- planning and performing the engagement to obtain limited assurance about whether the Selected Information is free from material misstatement, whether due to fraud or error;

- forming an independent limited assurance conclusion, based on the procedures we have performed and the evidence we have obtained; and
- reporting our conclusion to Smiths.

### **Summary of the work we performed as the basis for our conclusion**

We exercised professional judgment and maintained professional scepticism throughout the engagement. We planned and performed our procedures to obtain evidence that is sufficient and appropriate to obtain a meaningful level of assurance over the Selected Information to provide a basis for our limited assurance conclusion. Planning the engagement involves assessing whether Smiths' Reporting Criteria are suitable for the purposes of our limited assurance engagement. Our procedures selected depended on our judgement, on our understanding of the Selected Information and other engagement circumstances, and our consideration of areas where material misstatements are likely to arise.

In carrying out our engagement, we performed procedures which included:

- obtaining an understanding through inquiry of Smiths' control environment, processes and information systems relevant to the preparation of the Selected Information, but did not include evaluating the design of particular control activities, obtaining evidence about their implementation or testing their operating effectiveness;
- evaluating whether Smiths' methods for developing key estimates were appropriate and had been consistently applied, but did not include testing the data on which certain estimates are based or separately developing our own estimates against which to evaluate Smiths' estimates;
- performing limited substantive testing, including agreeing a selection of the Selected Information to corresponding supporting information such as invoices, vehicle fleet reports and product manuals;
- considering the appropriateness of the carbon conversion factor calculations and other unit conversion factor calculations used by reference to widely recognised and established conversion factors;
- reperforming a selection of the carbon conversion factor calculations and other unit conversion factor calculations;
- recalculating the energy intensity metric, dividing total energy use by revenue data;
- recalculating the percentage emissions reduction metric, dividing the difference between total scope 1 and 2 (market-based) emissions for the years ended 31 July 2025 and 2024 by total scope 1 and 2 (market-based) emissions for the year ended 31 July 2024, but did not include testing the input metrics for the year ended 31 July 2024 as explained in the "Other matter – comparative information" section above;
- reperforming calculations included in the Selected Information for mathematical accuracy and whether in accordance with the Reporting Criteria; and
- reading the Report with regard to the Reporting Criteria and for consistency with our findings over the Selected Information.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

### **Intended use of our report**

Our report has been prepared for Smiths solely in accordance with the terms of our engagement. We have consented to the publication of our report on Smiths' website for the purpose of Smiths showing that it has obtained an independent assurance report in connection with the Selected Information.

Our report was designed to meet the agreed requirements of Smiths determined by Smiths' needs at the time. Our report should not therefore be regarded as suitable to be used or relied on by any party wishing to acquire rights against us other than Smiths for any purpose or in any context. Any party other than Smiths who obtains access to our report or a copy and chooses to rely on our report (or any part of it) will do so at its own risk. To the fullest extent permitted by law, KPMG LLP will accept no responsibility or liability in respect of our report to any other party.

The maintenance and integrity of Smiths' website is the responsibility of the Directors of Smiths; the work carried out by us does not involve consideration of these matters and, accordingly, we accept no responsibility for any changes that may have occurred to the reported Selected Information, Reporting Criteria or Report presented on Smiths' website since the date of our report.

## Appendix 1 – Selected Information

Metric (unit)	Amount	Page reference within the Report
Global scope 1 GHG emissions FY2025 (tCO <sub>2</sub> e)	17,422	57 and 200
Global scope 2 (market-based) GHG emissions FY2025 (tCO <sub>2</sub> e)	20,286	57 and 200
Global total scope 1 and 2 emissions (market-based) FY2025 (tCO <sub>2</sub> e)	37,708	57 and 201
Global scope 1 and 2 GHG emissions reduction FY2024 to FY2025 (%)	11.4	57
Global scope 3 emissions FY2025 (tCO <sub>2</sub> e)	1,188,057	57 and 201
Global energy use FY2025 (MWh)	213,519	57 and 201
Energy efficiency FY2025 (MWh/£m revenue)	64	202
